

## § 751.9

or land uses established by zoning variances or special exceptions.

[40 FR 8551, Feb. 28, 1975, as amended at 41 FR 9321, Mar. 4, 1976]

### § 751.9 Effective control.

(a) In order to provide effective control of junkyards located within 1,000 feet of Interstate and Federal-aid primary highways, the State must:

(1) Require such junkyards located outside of zoned and unzoned industrial areas to be screened or located so as not to be visible from the main traveled way, or be removed from sight.

(2) Require the screening or removal of nonconforming junkyards within a reasonable time, but no later than 5 years after the date the junkyard becomes nonconforming unless Federal funds are not available in adequate amounts to participate in the cost of such screening or removal as provided in 23 U.S.C. 136(j).

(3) Prohibit the establishment of new junkyards unless they comply with the requirements of paragraph (a)(1) of this section.

(4) Exeditiously require junkyards which are illegally established or maintained to conform to the requirements of paragraph (a)(1) of this section.

(b) Sanitary landfills as described herein need not be screened to satisfy requirements of Title 23, U.S.C., but landscaping should be required when the fill has been completed and operations have ceased, unless the landfill area is to be used for immediate development purposes. A sanitary landfill, for the purposes of this part, is a method of disposing of refuse on land without creating a nuisance or hazards to public health or safety by utilizing the principles of engineering to confine the refuse to the smallest practical area, to reduce it to the smallest practical volume, and to cover it with a layer of earth at the conclusion of each day's operation or at such more frequent intervals as may be necessary.

(c) The State shall have laws, rules, and procedures sufficient to provide effective control, to discover illegally established or maintained junkyards shortly after such occurrence, and to cause the compliance or removal of

## 23 CFR Ch. I (4–1–07 Edition)

same promptly in accordance with State legal procedures.

### § 751.11 Nonconforming junkyards.

Subject to the provisions of § 751.9 of this part, the following requirements for the maintenance and continuance of a nonconforming junkyard apply:

(a) The junkyard must have been actually in existence at the time the State law or regulations became effective as distinguished from a contemplated use, except where a permit or similar specific State governmental action was granted for the establishment of a junkyard prior to the effective date of the State law or regulations, and the junkyard owner acted in good faith and expended sums in reliance thereon.

(b) There must be existing property rights in the junkyard or junk affected by the State law or regulation. Abandoned junk and junkyards, worthless junk, and the like are not similarly protected.

(c) If the location of a nonconforming junkyard is changed as a result of a right-of-way taking or for any other reason, it ceases to be a nonconforming junkyard, and shall be treated as a new junkyard at a new location.

(d) The nonconforming junkyard must have been lawful on the effective date of the State law or regulations and must continue to be lawfully maintained.

(e) The nonconforming junkyard may continue as long as it is not extended, enlarged, or changed in use. Once a junkyard has been made conforming, the placement of junk so that it may be seen above or beyond a screen, or otherwise becomes visible, shall be treated the same as the establishment of a new junkyard.

(f) The nonconforming junkyard may continue as long as it is not abandoned, destroyed, or voluntarily discontinued. Each State should develop criteria to define these terms.

### § 751.13 Control measures.

(a) Consistent with the goals of the National Environmental Policy Act of 1969 (42 U.S.C. 4321), recycling of junk and scrap is to be encouraged to the greatest extent practicable in the implementation of the junkyard control

program. Recycling should be considered in conjunction with other control measures. To facilitate recycling, junk or scrap should be moved to an automobile wrecker, or a scrap processor, or put to some other useful purpose.

(b) Every effort shall be made to screen where the junkyard is to continue as an ongoing business. Screening may be accomplished by use of natural objects, landscaping plantings, fences, and other appropriate means, including relocating inventory on site to utilize an existing natural screen or a screenable portion of the site.

(c) Where screening is used, it must, upon completion of the screening project, effectively screen the junkyard from the main traveled way of the highway on a year-round basis, and be compatible with the surroundings. Each State shall establish criteria governing the location, design, construction, maintenance, and materials used in fencing or screening.

(d) A junkyard should be relocated only when other control measures are not feasible. Junkyards should be relocated to a site not visible from the highway or to an industrial area, and should not be relocated to residential, commercial, or other areas where foreseeable environmental problems may develop.

(e) The State may develop and use other methods of operation to carry out the purposes of this directive, subject to prior FHWA approval.

#### § 751.15 Just compensation.

(a) Just compensation shall be paid the owner for the relocation, removal, or disposal of junkyards lawfully established under State law, which are required to be removed, relocated, or disposed of pursuant to 23 U.S.C. 136.

(b) No rights to compensation accrue until a taking or removal has occurred. The conditions which establish a right to maintain and continue a nonconforming junkyard as provided in § 751.11 must pertain at the time of the taking or removal in order to establish a right to just compensation.

#### § 751.17 Federal participation.

(a) Federal funds may participate in 75 percent of the costs of control measures incurred in carrying out the provi-

sions of this part including necessary studies for particular projects, and the employment of fee landscape architects and other qualified consultants.

(b) Where State control standards are more stringent than Federal control requirements along Interstate and primary highways, the FHWA may approve Federal participation in the costs of applying the State standards on a statewide basis. Where State standards require control of junkyards in zoned or unzoned industrial areas, Federal funds may participate only if such action will make an effective contribution to the character of the area as a whole and the cost is reasonable, but such projects should be deferred until the work in the areas where control is required has progressed well toward completion.

(c) Generally, only costs associated with the acquisition of minimal real property interests, such as easements or temporary rights of entry, necessary to accomplish the purposes of this part are eligible for Federal participation. The State may request, on a case-by-case basis, participation in costs of other interests beyond the minimum necessary, including fee title.

(d) Federal funds may participate in costs to correct the inadequacies of screening in prior control projects where the inadequacy is due to higher screening standards established in this part or due to changed conditions.

(e) Federal funds may participate in the costs of moving junk or scrap to a recycling place of business, or in the case of junk with little or no recycling potential, to a site for permanent disposal. In the latter case, reasonable land rehabilitation costs or fees connected with the use of such a disposal site are also eligible. In a case where the acquisition of a permanent disposal site by the State would be the most economical method of disposal, Federal funds may participate in the net cost (cost of acquisition less a credit after disposal) of a site obtained for this purpose.

(f) Federal funds may participate in control measure costs involved in any
